## SUMMARY

Full Stack Developer with 5+ years of experience building web applications, CRM/ERP systems and REST APIs with Laravel/PHP, Node.js/Express, React.js, Vue.js and .NET, backed by MySQL, PostgreSQL and vector databases. I work independently as well as in a team. On my own, I have built complete products end to end, designed system architecture (modular monolith and microservices) and REST APIs, built AI chatbots and RAG features, and handled AWS deployment and CI/CD. In a team I review code, take part in sprint planning and share ownership of releases. I talk to clients directly, understand what they need, and take ownership of delivering it.

## WORK EXPERIENCE

### Senior Laravel PHP Developer | Pixelz360 — Aug 2023 – Present

- Own the development of CRM and ERP systems using Laravel/PHP, Node.js, React.js, Next.js, Vue.js and MySQL, and moved them to a modular monolith and microservices design that doubled system performance
- Built .NET Windows Forms desktop systems for client business operations
- Designed REST APIs for client products and third-party systems, and added OpenAI API features to products
- Trained ML models on datasets built from PDF documents to support AI features
- Planned the architecture and handled deployment on AWS with Docker and NGINX, including SSL, DNS and Cloudflare, which improved load speed by 20%
- Review pull requests on GitHub and set up CI/CD pipelines, cutting deployment time by 40%
- Work directly with clients to understand requirements, and delivered 8+ production products for clients including McLaren Quinn (London) and Bardi Construction, working through Slack and Jira
- Built an AI chatbot for client websites and a Discord chatbot with the OpenAI API that answer user questions automatically, cutting manual support work
- Fix bugs in live systems, write technical documentation, and take part in sprint planning and technical discussions with the team
- Built and maintained WordPress (Elementor), WooCommerce and Shopify (Liquid) sites, handled SEO to keep them fast and easy to find, and launched the LeadX Forms plugin with a Vue.js portal

### Software Engineer | Cubix — May 2022 – Jul 2023

- Built the ProTrade ERP inventory system in PHP and Laravel (stock, purchase/sales orders, live tracking), improving inventory accuracy by 20% and cutting order time by 35%
- Built a RAG chatbot in Node.js with the OpenAI API, using streaming for real-time answers
- Reviewed teammates' code and tested my features before release to keep quality high
- Met with clients and the team to understand requirements, and delivered my tasks on time in sprints
- Wrote API and module documentation so new team members could pick up work faster
- Connected IoT devices to backend services using MQTT

### Laravel/PHP Developer | EvantageSoft — Feb 2021 – Apr 2022

- Integrated the Alfalah payment gateway and other third-party APIs in Laravel, improving transaction processing efficiency by 20%
- Introduced RabbitMQ in the food ordering system, reducing latency by 40%
- Worked with the Flutter team to design and improve REST APIs, making response times 30% faster
- Owned the payment and order modules from development to release and fixed live issues fast
- Built a CRM and live order tracking module for a food delivery platform using Google Maps API and distance-based delivery charges

## CORE SKILLS

**Backend & APIs:** PHP, Laravel, Node.js, Express.js, C#/.NET (Windows Forms), REST APIs, Payment Gateways, Python, SOLID, Design Patterns
**Front-End:** HTML5, CSS3, JavaScript, TypeScript, React.js, Next.js, Vue.js
**Databases & Architecture:** MySQL, PostgreSQL, SQL Optimization, MongoDB, Firebase, RabbitMQ, Microservices, Modular Monolith, Vector Databases, MQTT
**Linux & DevOps:** Linux, NGINX, Docker, GitHub CI/CD, AWS (EC2, Lightsail, S3, IAM), SSL, DNS, Cloudflare, Git, Code Review
**AI / LLM / ML:** OpenAI API, RAG Pipelines, ML Model Training, Chatbots, Discord Bots, Cursor, Codex, Claude Code
**CMS & E-Commerce:** WordPress (Elementor, Custom Themes & Plugins), Shopify (Liquid), WooCommerce, SEO, Figma to Website

## PROJECTS

**Geomem** – Hiking app APIs, Google Location
**My Schedule Buddy** – Kids routine portal & APIs
**AutoYard** – Car auction website & CRM
**Wicofly** – Store management CRM
**C-Link** – Construction procurement platform
**Knock Here** – Portal and system APIs
**LeadX Forms** – WordPress plugin & Vue.js portal
**HHC Dropshipping** – ERP/CRM platform & APIs
**UsiMoney** – Remittance API & CRM
**Lokal.pk** – Hotel booking management system with website, portal, vendor & inventory

## EDUCATION & CERTIFICATION

**Bachelor of Computer Science | Iqra University** — **2021 – 2025**
**ACCP Pro | Aptech Learning Center** — **2020 – 2023**
